LIGHT BULBS THAT ARE MEANT TO BE SEEN.

If big isn't big enough, come meet our E27 XXL Series.

Feeling good has everything to do with the right ambience and lighting plays a very big part in this. CALEX light bulbs are more than sources of light, they are true design statements.

The project of creating a decorative light bulb is a very interesting one. It requires the four elements: earth, fire, air and water, to be brought together. Unique varieties between individual bulbs emphasises the authenticity of CALEX products. That's why every bulb is unique in its own way.

GREAT LIGHT BULBS DESERVE GREAT CARE.

Therefore we advice to use a pair of soft gloves to change the bulb without touching the glass directly to prevent the glass from being stained.

Enjoy your beautiful new E27 XXL 'Splash' CALEX. Creators of ambience.
